

Massages at Beautonics

Swedish Massage

Designed to relax aching muscles where there is overall tension. We can work more deeply on problematic areas.

NO HANDS®Massage

This is a new approach to traditional Swedish Massage. It is deep, relaxing, rejuvenating and nourishing. Using the soft surfaces of her forearms instead of her hands, Wendy uses this in place of Swedish massage.

Indian Head Massage

This helps to create a balanced feeling of peace and calm, alleviates stress, anxiety and depression. It is ideal for treating headaches and focusing the mind.

Warming Lava Shell Massage

The warmth of the Lava Shells allows deep relaxation in this bespoke massage treatment. The shells glide over the back to warm and relax the muscles. Good for general relaxation, general back aches and pains, headaches and a pampering treat.

Aromatic Massage

Using your choice of pre-blended essential oils this can help to restore harmony and balance in the body and mind. This is a gentle form of massage.

Hopi Earcandling

This is an ancient therapy for the relief of numerous ear and sinus related conditions. The warmth created by these special candles and the clearing of the head makes this treatment feel like a massage for the inside of the head.
